1 Introduction

In this vignette we automatically generate figure panels produced for the paper by Barry *et al.*

```
library(TimerQuant)
library(ggplot2)
library(grid)
library(deSolve)
library(reshape2)
library(dplyr)
data("profileGradients")
data("maturationData")
data("FRETdata")
myTheme <- theme_bw()+theme(title=element_text(size=32),
  text=element_text(size=24), axis.title.y=element_text(vjust=1.5),
  panel.grid=element_blank())
```

2 Figure 1 and related supplemental figures

2.1 Figure 1B

```
t <- seq(0.001, 1200, by=0.1)
